

## BISMARCK OUT.

The Resignation of Prince Bismarck Accepted by the Emperor of Germany—Gossip as to the Cause of the Trouble.

BERLIN, March 19.—It is officially announced that Prince Bismarck's resignation of the Chancellorship has been accepted. Announcement of the acceptance was withheld by the Emperor because the Constitution did not admit of an interregnum in the tenure of the Chancellorship, and as the choice of a successor to Prince Bismarck was beset with difficulties, his Majesty deferred his acceptance until he could finally decide whom he should appoint as Chancellor.

All the members of the Prussian Ministry resigned at the same time Prince Bismarck tendered his resignation.

The Reichsanzeiger makes no allusion whatever to the resignation of Prince Bismarck, while the North German Gazette (Prince Bismarck's organ) published the reports concerning the resignation of the Chancellor, but made no editorial comment on the subject.

The National Gazette says: "The gratitude toward the restorers of Germany that is filling the hearts of Germans at this critical time proves that Prince Bismarck will long be regarded as the personification of Germany's growth and prosperity."

The National Gazette believes that Count Herbert Bismarck will remain in office. It says that the Prussian Ministry has not resigned.

The Tageblatt attributes the resignation of Prince Bismarck entirely to his disagreement with the Emperor's policy of social legislation. The boer was only slightly affected.

Prince Bismarck declined an invitation to the court banquet given in honor of the delegates to the labor conference in the picture gallery of the Schloss.

The censorship which was established over telegrams was continued until two o'clock yesterday afternoon, after which time all dispatches were allowed to pass as formerly. The resignation of the Prussian Ministry was merely a formal act, customary upon the resignation of the Prime Minister, but it is reported that the resignation of Count Bismarck and Herr von Maybach were seriously tendered and may be accepted.

Herr Richter Goldschmidt and other Freissinnige deputies were invited to the court banquet given on the part of the Emperor, which is unprecedented. It is stated that Prof. Hanel and Herr Quenil (Freissinniges) will enter the Cabinet as an earnest desire of the Emperor's to legislate for the people.

It is reported Prince Bismarck became incensed at the action of Herr Hinzpeter in composing the labor rescripts without consulting him. It is also asserted that the Chancellor recently had a dispute with Herr von Boetticher, whom the Emperor favored, and also differences with the Emperor on colonial matters.

## HEARING COMPLAINTS.

The Inter-State Commission Hearing Complaints in Nebraska.

LINCOLN, Neb., March 19.—Messrs. Morrison and Veasey, of the Inter-State Commerce Commission, at eleven o'clock yesterday morning began their investigations. Their coming attracted a large number of prominent citizens from all parts of the State, some to make complaints and give testimony, and others to see and hear. All the roads in the State were represented by attorneys and prominent officials. Railroad Commissioner Smith, of Iowa occupied a prominent position among the spectators, and was an interested listener. Chairman Walker of the "Gentlemen's" Association was present, taking notes of the proceedings, while five shorthand reporters and a dozen newspaper men attempted to record the proceedings.

The first witness examined was J. A. Munroe, assistant general traffic manager of the Union Pacific. Commissioner Morrison is an expert at handling a witness, and though Mr. Munroe knew pretty well how far to go, there were many interesting things developed.

## LIVE-STOCK ASSOCIATION.

Meeting of the Cherokee Live-Stock Association at Caldwell, Kan.

CALDWELL, Kan., March 19.—The Cherokee Strip Live-Stock Association met here yesterday in annual session. The meeting was called to order at two o'clock by Vice-President Charles H. Eldred, of Medicine Lodge. A few minor matters were disposed of and the board of directors of last year were re-elected by acclamation. The board afterward re-elected the old officers. From good authority it is learned that the cattlemen accept the inevitable with good grace and are preparing to move by October 1. The proper officers have been instructed to pay the Cherokees the rent from July 1 until October 1.

The fact of the many fires of late on the Strip was discussed and it was decided to draw up a memorial to President Harrison asking for protection from a repetition of these acts.

A Farmer's Bad Break.

St. JOSEPH, Mo., March 19.—Some time ago James B. Matney, one of the wealthiest farmers and business men in the county, owner of a large flouring mill in the country, received several anonymous letters stating that if he did not put \$500 in a tin box and deposit it at the foot of a certain tree on his land his mill would be burned and all his stock poisoned. Yesterday Matney deposited a tin box with a few cents in it at the tree designated. He then watched for the fellow with a shotgun and when he approached and began looking for the box Matney fired, scaring him away, after he had discovered that it was one of his near neighbors, Louis Curd, who was financially embarrassed. Last evening Curd was placed in the jail here.

"The world grows weary praising men,  
And weary grows of being praised—  
But never weary grows the pen  
Which writes the truths that have amazed  
The thousands who have been given up by  
their physicians and who have been restored  
to complete health by using that safest of all  
remedies for functional irregularities and  
weaknesses, which are the bane of woman-  
kind. We refer, of course, to Dr. Pierce's  
Favorite Prescription, the only guaranteed  
cure for all those chronic ailments peculiar  
to women. Head the guarantee on the bot-  
tle-wrapper."

## Commendable.

All claims not consistent with the high character of Syrup of Figs are purposely avoided by the Cal. Fig Syrup Company. It acts gently on the kidneys, liver and bowels, cleansing the system effectually, but it is not a cure-all and makes no pretensions that every bottle will not substantiate.

Who is Dr. A. T. Shallenberger? He is a prominent physician of Rochester, Penna., who graduated at Jefferson Medical College in 1846. In 1847 he announced the theory that all Malarial disease was caused by living germs in the blood and demonstrated its correctness by his Antidote for Malaria, which cured when all else failed. The microscope now reveals these germs, and Physicians accept the fact. If you have Malaria in your system, get the medicine and be well.

## Thinkers Will Read This.

Not one physician in a thousand has ever succeeded in relieving a person suffering from weak and wasting or consumptive kidneys, yet they continue to experiment, and after the death of their patient ask for their fee. The kidney is a delicate organ, and yet good health in a large measure depends upon its proper action. Let the kidneys become sore or inactive, and uric acid is eliminated from the effete matter that passes too slowly out of the system. From this cause arises many mysterious pains in the back, side, shoulder, joints and limbs. A feeling of ennui comes over the victim. The world seems dark and gloomy. The nerves become shattered; suicide is contemplated, and one's condition is most pitiable. Dr. Bull's Sarsaparilla contains such herby juices as weak kidneys demand. It has relieved and cured many cases that doctors gave up as hopeless. It checks decay and aids the kidneys in a performance of their natural function.

## A STYLISH HAT

is unquestionably quite an essential factor in the make-up of a fashionably-attired lady. But how much more essential to good looks, and especially to her enjoyment, is good health, without which she cannot look well, feel well or enjoy life properly.

The trying ordeals which fashionable society imposes on its devotees are enough to severely test the physical strength and endurance of the most robust. Irregular and late hours, over-rich and indigestible food, late suppers, the fatigue of the ball-room, the bad air of the ill-ventilated, overcrowded theatre, are each, in themselves, sufficient to upset the system and ruin the health of the delicate and sensitive. Combined, they can hardly fail, if persisted in, to seriously impair the health of the hardest. Ladies generally possess less powers of endurance than their male consorts, and so the sooner succumb to these deleterious influences. They become pale, haggard and debilitated, and constantly experience a sense of lassitude—that "dread feeling," as so many express it. The least exertion fatigues them. Various neuralgic and other pains harass and distress the sufferer. Headache, backache, "bearing-down" sensations, and "female weaknesses" follow and sorely afflict the sufferer.
